EXERCISES

Ex. 1-85—Objective of financial reporting.

What is the objective of financial reporting? How do general-purpose financial statements help meet this objective.

Ans: NA, LO: 1, Bloom: C, Difficulty: Moderate, Min: 5, AACSB: None, AICPA BB: None, AICPA FC: Reporting, AICPA PC: Communication, IMA: Reporting, IFRS: None

Solution 1-85

The objective of financial reporting is to provide financial information about the reporting entity that is useful to present and potential equity investors, lenders, and other creditors in decisions about providing resources to the entity.

General-purpose financial statements provide financial reporting information to a wide variety of users. They help shareholders, creditors, employees, and regulators to better understand a company's financial position and related performance.

Ex. 1-86—Development of accounting principles.

Presented below are two independent, unrelated statements regarding the formulation of generally accepted accounting principles. Each statement contains some incorrect or debatable statement(s).

Statement I

The users of financial accounting statements have coinciding and conflicting needs for statements of various types. To meet these needs, and to satisfy the financial reporting responsibility of management, accountants prepare different sets of financial statements for different users.

Statement II

The FASB should be responsive to the needs and viewpoints of the entire economic community, not just the public accounting profession. The FASB therefore will succeed because it will deal effectively with all interested groups.

Instructions

Evaluate each of the independent statements and identify the areas of fallacious reasoning in each. Explain why the reasoning is incorrect. Complete your discussion of each statement before proceeding to the next statement.

Ans: NA, LO: 1, 2, Bloom: E, Difficulty: Difficult, Min: 10, AACSB: Reflective Thinking, AICPA BB: Crit. Think., AICPA FC: Reporting, AICPA PC: Prob. Solving, IMA: FSA, IFRS: None

Solution 1-86Statement I

It is true that users of financial accounting statements have coinciding and conflicting needs for statements of various types. However, to meet these needs, accountants generally prepare a single set of general-purpose financial statements, rather than a number of different types of financial statements. It may be argued that accountants often do prepare special statements for particular purposes, but in general the accounting profession has relied on general purpose financial statements prepared in conformance with generally accepted accounting principles.

Statement II

It is true that the FASB should be responsive to the needs of the entire economic community, not just the public accounting profession. However, it is not clear whether the FASB will succeed. The FASB will have the best chance of survival if it deals with problems promptly, sets proper priorities, takes whatever action it thinks is right and in the public interest, and handles pressures responsibly without overreacting to them.

Ex. 1-87—Publications and organizations.

Significant accounting publications are listed below (1-5). Sources or sponsors of accounting publications are identified next by alphabetical character (a-d). Match the publications with their sources.

Ex. 1-88—FASB.

The Financial Accounting Standards Board was established because many groups interested in financial reporting believed that the Accounting Principles Board was not effective. Discuss the apparent advantages that the FASB has over its earlier counterpart, the APB.

Ans: NA, LO: 2, Bloom: C, Difficulty: Moderate, Min: 10, AACSB: None, AICPA BB: None, AICPA FC: Reporting, AICPA PC: Communication, IMA: FSA, IFRS: None

Solution 1-88

1. Smaller membership. The FASB is composed of seven members, replacing the relatively large 18-member APB.
2. Full-time, remunerated membership. FASB members are well-paid, full-time members, appointed for renewable five-year terms. The APB members were unpaid and part-time.
3. Greater autonomy. The APB was a senior committee of the AICPA, whereas the FASB is not part of any single professional organization. It is appointed by and answerable only to the Financial Accounting Foundation.
4. Increased independence. The APB members retained their private positions with firms, companies, or institutions. The FASB members must sever all such ties.
5. Broader representation. All APB members were required to be CPAs and members of the AICPA. Currently, it is not necessary to be a CPA to be a member of the FASB.

Ex. 1-89—Evolution of a statement of financial accounting standards.

In establishing financial accounting standards, two basic premises of the FASB are (1) The FASB should be responsive to the needs and viewpoints of the entire economic community, not just the accounting profession. (2) It should operate in full view of the public through a "due process" system that gives interested persons ample opportunity to make their views known. To ensure achievement of these goals, what steps does the FASB follow in the development of a typical FASB standard?

Ans: NA, LO: 2, Bloom: K, Difficulty: Moderate, Min: 5-7, AACSB: None, AICPA BB: None, AICPA FC: Reporting, AICPA PC: Communication, IMA: FSA, IFRS: None

Solution 1-89

The steps in the evolution of an FASB Accounting Standards Updates are:

- a. Topics are identified and placed on the Board's agenda.
- b. Research and analysis are conducted and preliminary views of pros and cons are issued.
- c. A public hearing on the proposed standard is held.
- d. The Board evaluates the research and public response and issues an exposure draft.
- e. The Board evaluates the responses and changes the exposure draft, if necessary. The final standard is then issued.
